

EXECUTIVE BRIEF

OnBase Medical Imaging Viewer

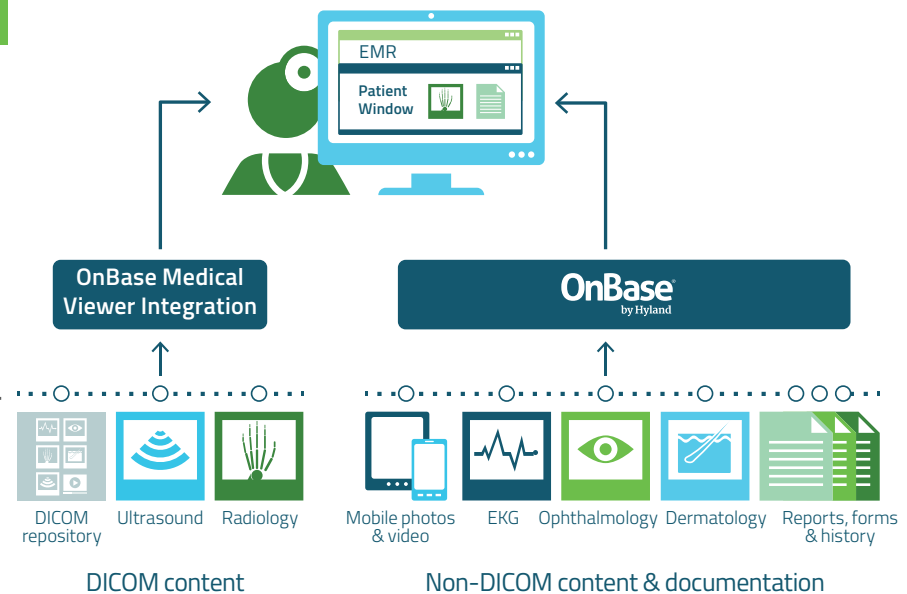

Pair the OnBase Medical Imaging Viewer with the Patient Window. Provide one place for clinicians to view all of the clinical information they need, when, where and how they need it.

HIGHLIGHTS:

- Presents DICOM and non-DICOM content, alongside associated reports and other pertinent clinical content within the EMR
- Eliminates the need to first migrate DICOM content to a VNA or other archive solution
- Extends to smart phones and tablets

IMPACT:

- Supports more informed care by providing clinicians with a single and more comprehensive view of patient information
- Offers healthcare organizations a more cost-effective way to provide access to DICOM content across the enterprise
- Provides safe and secure mobile access to clinical data, expediting decisions, increasing physician satisfaction and elevating care
